Key Terms

- **Close Project or Phase.** The process of finalizing all activities for the project, phase, or contract
- **Closing Process Group.** The process(es) performed to formally complete or close a project, phase, or contract

Closing Process Group

- The Closing Process Group consists of the processes performed to formally complete or close a project, phase, or contract

Closing Process Group

- This Process Group verifies that the defined processes are completed within all of the Process Groups to close the project or phase, as appropriate, and formally establishes that the project or project phase is complete

Closing Process Group

- The key benefit of this Process Group is that phases, projects, and contracts are closed out appropriately

Closing Process Group

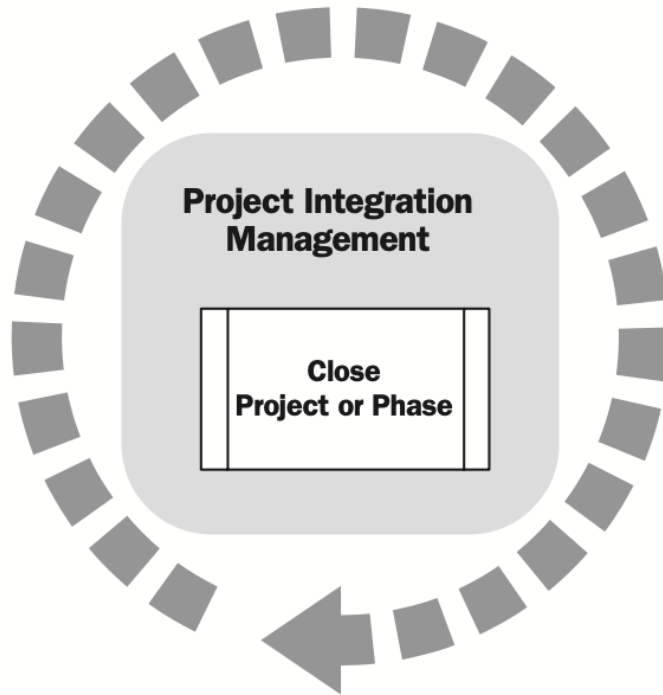

- While there is only one process in this Process Group, organizations may have their own processes associated with project, phase, or contract closure
- Therefore, the term Process Group is maintained

Closing Process Group

- This Process Group may also address the early closure of the project, for example, aborted projects or cancelled projects

The dashed circular arrow indicates that the process is part of the Project Integration Management Knowledge Area. This Knowledge Area coordinates and unifies the processes from the other Knowledge Areas.

Close Project or Phase

- The process of finalizing all activities for the project, phase, or contract
- This process is performed once or at predefined points in the project

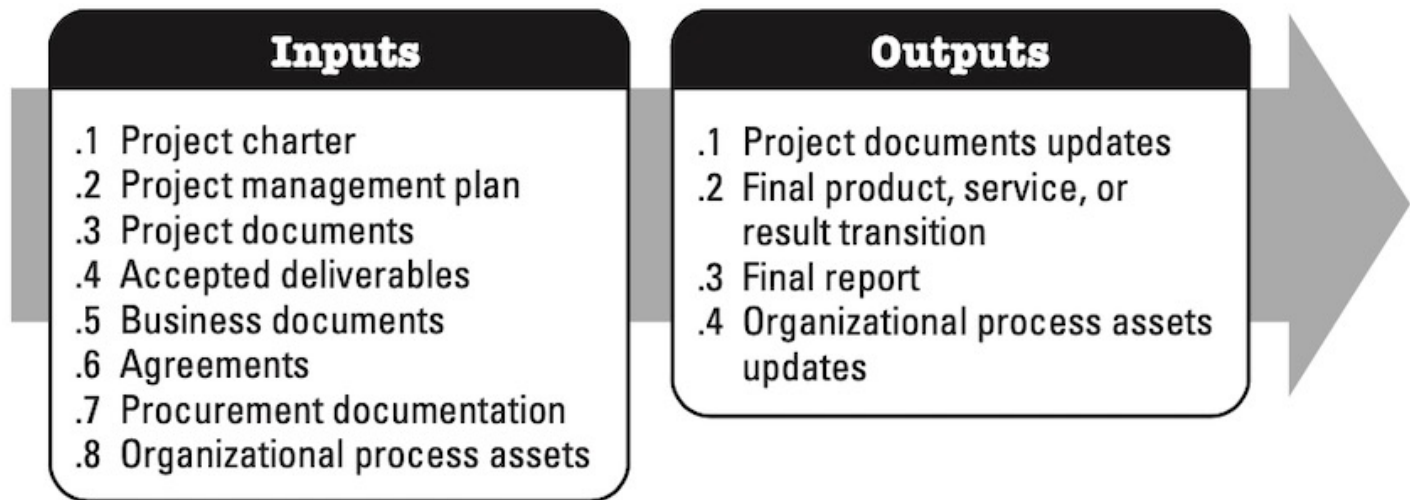

Close Project or Phase

- The key benefits of this process are the project or phase information is archived, the planned work is completed, and organizational resources are released to pursue new endeavors

Close Project or Phase

Close Project or Phase: Inputs and Outputs
